

Cardiovascular diseases, including stroke, are our nation's No. 1 killer. Join the American Heart Association in the battle against these diseases and celebrate February as **AMERICAN HEART MONTH**

Are You At Risk?

50% of people at risk are not identified through routine testing. SpectraCell's LPP™ testing can reveal additional risk factors that can only be identified with advanced lipoprotein testing.

Who should take the LPP™ Test?

All patients, and especially those who:

- Have a family history of heart disease or diabetes
- Have been diagnosed with heart disease or diabetes
- Are already taking cholesterol-lowering medications
- Have been diagnosed with Metabolic Syndrome (high blood pressure)

Ask your doctor today to schedule your LPP™ test!
