

Are YOU getting the nutrients YOU need?

WHY IS NUTRIENT STATUS IMPORTANT?

Vitamin, mineral and antioxidant deficiencies have been shown to suppress the functions of the immune system which can contribute to degenerative process such as :

- Arthritis
- Cardiovascular disease
- Cancer
- Diabetes

You may be deficient in some vitamins, minerals, antioxidants and/or other essential micronutrients and not even know it.

50% of people taking multivitamins are still nutritionally deficient. - William Shive, University of Texas at Austin

STANDARD TEST RESULTS DO NOT MEASURE IF THE NUTRIENT IS PROPERLY FUNCTIONING WITHIN THE BODY.

SpectraCell Laboratories developed their exclusive, patented micronutrient tests to measure the function of selected vitamins, minerals, antioxidants and other essential micronutrients within your white blood cells. Analysis can reveal a person's functional nutrient status over a much longer time period than conventional serum testing. SpectraCell's tests give a more meaningful measurement of nutritional status than all other nutritional testing.

But I eat a balanced diet, exercise and take a multivitamin...

If this describes all or part of your lifestyle, read on. Many people work at improving their health, yet some individuals still have deficiencies. Why?

BIOCHEMICAL INDIVIDUALITY

Because each of us is metabolically and biochemically unique, the micronutrient requirements for one person may be quite different than the requirements for another.

ABSORPTION

Although you may eat a balanced diet, if you do not absorb vitamins, minerals, antioxidants and/or other essential micronutrients properly, you will have deficiencies.

CHRONIC ILLNESS

Health conditions such as arthritis, cancer, cardiovascular disease, diabetes, fatigue and multiple sclerosis, to name a few, can be affected, directly or indirectly, by micronutrient deficiencies.

AGING

Our micronutrient requirements at age 30 are quite different from our requirements at age 40, 50 and beyond. Absorption difficulties, especially of vitamin B12, quite commonly occur as we age.

LIFESTYLE

Excessive physical activity, prescription drugs, smoking, alcohol and sedentary habits all impact micronutrient demands.

SpectraCell's micronutrient testing is the only test that takes all the above factors and many others into consideration to identify your nutrient status. With this information, specific deficiencies that could negatively influence your health may be corrected.

MICRONUTRIENT TESTING

Sample Results

YOU MAY BE DEFICIENT IN THESE VITAMINS, MINERALS, ANTIOXIDANTS AND/OR OTHER ESSENTIAL MICRONUTRIENTS AND NOT EVEN KNOW IT.

VITAMINS

Vitamin A
Vitamin B1
Vitamin B2
Vitamin B3
Vitamin B6
Vitamin B12
Vitamin C
Vitamin D
Vitamin K
Biotin
Folate
Pantothenate

MINERALS

Calcium
Magnesium
Zinc
Copper

AMINO ACIDS

Asparagine
Glutamine
Serine

ANTIOXIDANTS

Alpha Lipoic Acid
Coenzyme Q10
Cysteine
Glutathione
Selenium
Vitamin E

SPECTROX™
for total
antioxidant
function

CARBOHYDRATE METABOLISM

Chromium
Fructose Sensitivity
Glucose-Insulin
Metabolism

FATTY ACIDS

Oleic Acid

METABOLITES

Choline
Inositol
Carnitine

HOW DO I GET MY MICRONUTRIENT TESTS?

Your healthcare provider can tell you more about SpectraCell's micronutrient tests and order a test for you, or you can call SpectraCell for more information on how to order. You will receive your easy-to-read, comprehensive test results within 3 weeks. Additional testing services including homocysteine and specialized tests to assess cardiovascular risk are also available through SpectraCell Laboratories.

PAYMENT METHODS

- Check or Credit Card - All payments to SpectraCell may be made by check or major credit card.
- Medicare - SpectraCell accepts Medicare assignment. Most test components are reimbursable when ordered for diagnostic purposes by a licensed Medicare provider.
- Insurance - When ordered for diagnostic purposes, test components are reimbursable by most insurance carriers.
